

EXPERIMENT 2: Zoho Creator Setup and Platform Exploration using Loan Application Form

Aim

To set up and explore the Zoho Creator platform by creating a Loan Application Form using low-code development features.

SCREENSHOTS:

The first screenshot shows the 'Create from Scratch' screen. It has a 'Name form' label, a text input field containing 'Loan Application', and a blue 'Create Form' button. Navigation links for '< Back' and 'Close' are at the top.

The second screenshot shows the 'Basic Fields' panel on the left with icons for Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, and Drop Down. The main area contains a Zia logo and instructions: 'Use Zia field suggestions with one click.' and 'Drag a field here'.

The third screenshot shows the form builder with a list of fields: Applicant_Name, Date of Birth, PAN Number, Email Address, Contact Number, Residential Address, Employment Type, Monthly Income, Existing Liabilities, and Loan Type. The 'Field Properties' panel on the right shows settings for 'Applicant_Name', including field name, link name, validation (Mandatory), and display fields (First Name, Last Name, Suffix).

The screenshot displays the Zoho Creator interface for building a 'Loan Application' form. The central workspace contains a form with the following fields: Email Address, Contact Number, Residential Address, Employment Type, Monthly Income, Existing Liabilities (highlighted), Loan Type, Purpose of Loan, Preferred Callback Time, and Consent for Credit Check. The 'Existing Liabilities' field is currently selected, and its properties are shown in the right-hand panel. The 'Field Properties' panel for 'Existing Liabilities' includes: Field name (Existing Liabilities), Field link name (Existing_Liabilities), a link to View Field References, a Choices section with a note 'Renaming the choices will update the values in the existing records, if any.' and three choice options (Choice 1, Choice 2, Choice 3), and a Validation section. The bottom status bar shows 'Trial has expired' and provides links for 'Upgrade', 'Help', and a trash icon.

Observation

The Loan Application Form was created successfully using drag-and-drop fields. Zoho Creator automatically generated the database and report view, and field validations were easy to configure.

Result

The Zoho Creator setup and platform exploration were completed successfully. The experiment demonstrated that Zoho Creator enables quick and efficient Loan Application Form development with minimal coding.
