

Experiment 4: Data Modelling and Form Design for Loan Application Form

Aim

To design a data model and user-friendly Loan Application Form in Zoho Creator for storing and managing loan application details efficiently.

SCREENSHOTS:

Observation

The Loan Application Form was organized into sections such as Personal Details, Contact Details, Income Details, and Loan Details. The data was structured properly, making data entry, storage, and retrieval simple and accurate.

Result

The data modelling and form design for the Loan Application Form were completed successfully. The experiment showed that Zoho Creator helps create well-structured forms and organized data management with minimal coding effort.
